

Translation

The following is an English translation of an independent assurance report prepared in Japanese and is for information and reference purposes only. In the event of a discrepancy between the Japanese and English versions, the Japanese version will prevail.

Independent Assurance Report

July 25, 2023

TO:

Mr. Yoshiro Aikawa
President and Chief Executive Officer,
Representative Director
Taisei Corporation

Kenji Sawami
Kiyotaka Kinugawa
Engagement Partner
Ernst & Young ShinNihon LLC
Tokyo, Japan

We, Ernst & Young ShinNihon LLC., have been commissioned by Taisei Corporation (hereafter the "Company") and have carried out a limited assurance engagement on the Key Environmental Performance Indicators (hereafter the "Indicators") of the Company, TAISEI ROTEC CORPORATION*, TAISEI U-LEC CO.,LTD*, Taisei-Yuraku Real Estate Co.,Ltd.*, TAISEI SETSUBI CO.,LTD.*, TAISEI HOUSING CORPORATION*, SEIWA RENEWAL WORKS CO.,LTD* and J-FAST Co., Ltd.* for the year ended March 31, 2023 as included in "Sustainability / Environment(E) / Environmental Data" on the Company's website (hereafter the "Report"). The scope of our assurance procedures was limited to the Indicators marked with the symbol "🟡" in the Report.

1. The Company's Responsibilities

The Company is responsible for preparing the Indicators in accordance with the Company's own criteria, which it determined with consideration of Japanese environmental regulations as presented in the Report.

Greenhouse gas (GHG) emissions are estimated using emissions factors, which are subject to scientific and estimation uncertainties given instruments for measuring GHG emissions may vary in characteristics, in terms of functions and assumed parameters.

2. Our Independence and Quality Control

We have met the independence requirements of the Code of Ethics for Professional Accountants issued by the International Ethics Standards Board for Accountants, which is based on the fundamental principles of integrity, objectiveness, professional competence and due care, confidentiality, and professional behavior.

In addition, we maintain a comprehensive quality control system, including documented policies and procedures for compliance with ethical rules, professional standards, and applicable laws and regulations in accordance with the International Standard on Quality Management (ISQM) 1 issued by the International Auditing and Assurance Standards Board.

3. Our Responsibilities

Our responsibility is to express a limited assurance conclusion on the Indicators included in the Report based on the procedures we have performed and the evidence we have obtained.

We conducted our limited assurance engagement in accordance with the *International Standard on Assurance Engagements: Assurance Engagements Other than Audits or Reviews of Historical Financial Information* ("ISAE 3000") (Revised) and, with respect to GHG emissions, the *International Standard on Assurance Engagements: Assurance Engagements on Greenhouse Gas Statements* ("ISAE 3410"), issued by the International Auditing and Assurance Standards Board.

The procedures, which we have performed according to our professional judgment, include inquiries, document inspection, analytical procedures, reconciliation between source documents and Indicators in the Report, and the following:

- Making inquiries regarding the Company's own criteria that it determined with consideration of Japanese environmental regulations, and evaluating the appropriateness thereof;
- Inspecting relevant documents with regard to the design of the Company's internal controls related to the Indicators, and inquiring of personnel responsible thereof at the headquarter and sites visited (2 construction site and 2 factory);
- Performing analytical procedures concerning the Indicators at the headquarter and sites visited (2 construction site and 2 factory);
- Testing, on a sample basis, underlying source information and conducting relevant re-calculations at the headquarter and sites visited (2 construction site and 2 factory);

The procedures performed in a limited assurance engagement are more limited in nature, timing and extent than a reasonable assurance engagement.

As a result, the level of assurance obtained in a limited assurance engagement is lower than would have been obtained if we had performed a reasonable assurance engagement.

4. Conclusion

Based on the procedures performed and evidence obtained, nothing has come to our attention that causes us to believe that the Indicators included in the Report have not been measured and reported in accordance with the Company's own criteria that it determined with consideration of Japanese environmental regulations.

* CO₂ emissions, energy use, fossil fuel use, electricity use, city gas, LPG, GTL, industrial waste emissions only
