

# A pioneering corporate group contributing to the development of a resilient society where people can live affluent and cultural lives

To all our subcontractors and suppliers

## The Taisei Group is promoting sustainable procurement

### What is sustainability?

The original meaning is "can be sustained" or "can be continued." The concept is constructing a world which can continue for a long time by harmonizing the three aspects of "environment" and "society", as well as "economy" which is founded on the other two.

### Taisei Group's Sustainable Procurement

In our "Procurement Policy", we stipulated policies on respect for human rights, environmental conservation initiatives, and promotion of sustainable procurement, and promote sustainable procurement activities together with our subcontractors and suppliers.

Also, to deepen the understanding of our subcontractors and suppliers, we prepare "Sustainable Procurement Guidelines", and publish them on our website.

Procurement Policy

Sustainable Procurement Guidelines

### Sustainable Procurement Undertaken Together with our subcontractors and suppliers

Sustainability issues, which include global issues such as environmental problems and human rights issues, must be tackled over the entire supply chain together with our subcontractors and suppliers. The understanding and cooperation of everyone involved is necessary for the said issues as well as safety, quality, compliance with laws and regulations, etc.

In order to monitor the status of initiatives in entire supply chain and bring about improvements as necessary, we are promoting exchanges of opinion, training, e-learning, etc.

We sincerely ask for your continued cooperation in these matters.

### Sustainable Procurement Activities of the Taisei Group (From the Sustainable Procurement Guidelines)

1. Compliance with Laws, Regulations and Social Norms
2. Fair Business Dealings
3. Respect for Human Rights
4. Promotion of Safety and Hygiene
5. Commitment to Environmental Conservation
6. Ensuring and Improving Safety and Quality
7. Information Disclosure
8. Commitment to Information Security
9. Activities Contributing to Society
10. Business Continuity in Times of Disaster
11. Promotion of Sustainable Procurement
